## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 44-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsumura, 6,570,233.

See reasons of record in the previous Office action of 22 August 2006.

Claims 1-8, 10-12, 32-39, and 41-43 are allowed.

### ***Conclusion***

Applicant argues with respect to claims 44-45 that Matsumura does not teach variations in thickness of the layer 60 to set a depth of the region 55. Claims 44 and 45 do not say anything about variations in thickness setting a depth. The claim limitation requires only that the thickness of the first poly film be selected to provide a desired depth. Matsumura teaches to choose the layer thin enough so that sufficient phosphorus can pass through the film (column 5, lines 20-25). So the reference teaches to select a thickness ("thin" enough) to get the desired depth, which is all that is required by the claim language. But, at any rate, one of ordinary skill would not be motivated to select a layer that is too thick, because the implanted region would be too shallow.

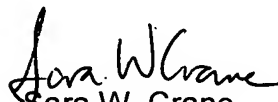

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
